*Approximate average times with backlight off.
 Tests of the internal battery last were done after at least 16 hours charge.

Features

Tare and set tare.
Manual auto-zero.

"Price-Computing models" include, also:

Set price: It allows to set the price to operate several times with the same item.
Display of the amount in secondary currency.
Programmable switch on/off of the backlight.
Automatic switch off: Available in models with internal battery. It allows to program a time to switch the scale off automatically, in case that there is no weight on the plate or a key is pressed.
PLU programming: It allows to program prices and codes for up to 100 articles.
Quick article search: It is an useful tool to modify prices in programmed articles.
Programming of EAN heading (this parameter only applies to scales connected to POS or ECR).
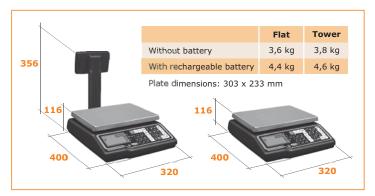

Communications

Connection to computer, POS or ERC, by means of incorporated RS-232 port. Communication protocols available for the main brands and models in the market.
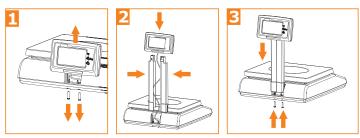

- Models with one protocol (G-300, G-300 B, G-310, G-310 B): The protocol update is made by telecharging the new one from the PC.

- Multi-protocol models (G-320, G-320 B): The protocol is selected among all the available ones inside the scale. You can also load new protocols (up to a maximum of 60) by telecharging them from computer.
